PROFESSIONAL SUMMARY

Enterprise Engineering Leader and Solutions Architect with 20+ years of experience driving platform modernization, digital transformation, and cloud-native architecture at scale. Proven track record of scaling services from 1 to 25M+ customers across Fortune 500 organizations. Expert in Event-Driven Systems, multi-cloud implementations (AWS, Azure, GCP), and AI-augmented engineering architectures (RAG, Agentic systems, MCP). Specializes in seamlessly bridging legacy enterprise complexity with modern Generative AI capabilities to accelerate delivery velocity and lower operational costs.

CORE COMPETENCIES

- **Leadership & Strategy:** Global Engineering Management (Teams of 20), Strategic AI Advisory, Digital Transformation, Presales, SOW, Stakeholder Management.
- **AI & Augmented Engineering:** Agentic Architecture, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), LangChain, LangGraph, Amazon Bedrock, Claude Code, Cursor, Context Engineering.
- **Cloud, Data & Event Streaming:** AWS/Azure/GCP, Kubernetes, Terraform (IaC), Event-Driven Architecture (Kafka), Databricks, Vector Databases (Zilliz, Pinecone), PostgreSQL, AWS DynamoDB, GCP Spanner, Apache Spark.
- **Security & Compliance:** OAuth 2.0, SAML, OWASP, PCI DSS, GDPR, HIPAA, ISO/IEC 42001, SPIFFE.
- **Methodologies:** DORA Metrics, SAFe, Scrum, CI/CD Automation, Test-Driven Development (TDD), Domain-Driven Design (DDD), C4/UML Modeling, GitOps.
- **Industry Verticals:** Telecommunications, Insurance, Banking, FinTech, Healthcare, IoT, Payment Processing, Supply Chain, E-commerce.

PROFESSIONAL EXPERIENCE

Principal Consultant — Fractional Architecture & AI Advisory

Independent | Doral, FL | Aug 2025 – Present

- **Accelerated MVP portal delivery by 75%** for a mid-market financial services client by pioneering AI-native development workflows (Claude Code, Cursor, Replit), shortening time-to-market from months to weeks.
- **Engineered an Agentic Event Storming facilitator** using Python and CrewAI, automating complex domain discovery and synthesizing full Domain-Driven Designs (DDD) from targeted sub-domains; open-sourced the reference implementation (github.com/humbertobellor/eventstorming).
- **Developed a stealth voice-agent and intelligent routing MVP** for SMBs, achieving a >95% classification accuracy for incoming service requests and significantly reducing customer churn.
- **Conducted AI-readiness assessments** for Biotech startups, identifying high-value vectors for automation, data readiness, and optimized data engineering pipelines.

Principal Engineer, Associate Director — Digital Engineering and IoT

Cognizant Technology Solutions | Miami, FL | Apr 2021 – Jul 2025

- **Scaled global engineering organizations** from 1 to 20+ cross-functional engineers and managers across the US, Mexico, and India, delivering multi-million dollar modernization programs for Fortune 100 enterprises.
- **Modernized a Fortune 100 retailer's supply chain** by architecting an event-driven visibility platform (Kafka/Camel) supporting 13,000 store locations in near-real-time.
- **Reduced contract information retrieval time by 33%** by deploying a production RAG management system using Azure OpenAI, LangChain, and Zilliz Vector DB, cross-referencing enterprise documents with legacy APIs.
- **Boosted system reliability by 35%** for a Fortune 500 FinTech through the strategic migration of high-volume, on-premises Kafka streaming platforms to AWS cloud-native architectures.
- **Architected a high-throughput event migration** for a global payments provider, moving core processing to AWS to seamlessly handle 1.2M daily transactions.
- **Optimized delivery velocity** as Scrum Master across 34 sprints, maintaining 90% sprint burn-down accuracy and exact PI planning alignment.

Senior Solutions Architect

Concentrix | Doral, FL | Oct 2020 – Apr 2021

- **Designed the architecture runway** for a high-scale wearable IoT platform serving 2M+ active customers, ensuring 99.9% availability for critical real-time features.

- **Streamlined program prioritization** using Weighted Shortest Job First (WSJF) scoring, increasing value-delivery efficiency across 3 consecutive PI Planning cycles.

Manager, Technical Architecture & Delivery

Accenture | Doral, FL | Jan 2019 – Jun 2020

- **Secured microservices for robotic surgical devices** at a major pharmaceutical firm by implementing a Zero-Trust API management and security layer (Apigee/Istio) on Kubernetes.
- **Led the delivery of a mobile banking app** for a Fortune 500 financial institution, integrating legacy mainframes with a modern cloud front-end to scale to 2.4M active users.
- **Established a reference architecture for Amazon Connect** at a major health insurer, projecting over \$1.5M in annual operational savings through cloud-native contact center migration.
- **Built proof-of-architecture (PoA) demonstrations** that directly secured 2 new enterprise accounts with Fortune 500 clients by validating technical feasibility.

Digital Operations Architect

Millicom | Doral, FL | May 2018 – Nov 2018

- **Owned the Digital Services platform for 46M subscribers** across 5 countries, managing the performance, security, and scalability of an API gateway handling a \$4B/year transaction run rate.
- **Enabled rapid digital adoption in LATAM** by deploying high-performance APIs via Apigee Edge with strictly enforced SLAs and business-critical KPIs.
- **Partnered with InfoSec to implement SSDLC practices**, including automated threat modeling and vulnerability testing across all customer-facing applications.

Independent Consultant

Self-Employed | Doral, FL | Aug 2016 – Apr 2018

- **Provided fractional technical consulting** and modernization services for SMBs in Germany and Venezuela.
- **Designed and implemented scalable e-commerce infrastructure** and automated operational reporting pipelines to revitalize legacy digital products.

Lead Engineer

Spafinder Wellness | Miami, FL | May 2015 – Jun 2016

- **Engineered financial transaction APIs** for 25,000 wellness facilities, maintaining 99.9% uptime for core gift card processing via Java/Spring Boot microservices and Redis.
- **Championed agile best practices** and directly mentored 12+ software engineers across 18 development sprints.

Senior Manager, Production Systems

Verizon | Doral, FL | Sep 2007 – Apr 2015

- **Managed a \$9B annual revenue platform** serving 25M+ customers, overseeing complex carrier integrations (AT&T, T-Mobile, Sprint) with a 100% success rate on core system releases.
- **Accelerated end-of-month batch fulfillment by 3x**, reducing complex data encryption processing cycles from 3 months down to 4 days.
- **Optimized Java CRM APIs to sustain 35,000 transactions per second (TPS)** at peak load while maintaining seamless, near-instant data center failover capabilities.
- **Automated the CI/CD deployment pipeline**, reducing production release errors by 50% while doubling overall deployment frequency.

EDUCATION

- **Master of Science (MSc), Computer Science** | Universidad Simón Bolívar
- **Bachelor of Science (BSc), Computer Science** | Universidad Simón Bolívar

CERTIFICATIONS

- AI Fluency & Claude Code (Anthropic)
- Machine Learning (Stanford/Coursera)
- SAFe for Architects 5.0 | Certified Scrum Master (Scrum.org)
- Google Cloud, AWS, Apache Spark, and Apigee Specializations
