PROFESSIONAL SUMMARY

Engineering leader and architect with 20+ years modernizing platforms and scaling cloud-native systems for Fortune 500 organizations. Track record of scaling services from 1 to 25M+ customers and building global engineering teams of up to 20. Deep expertise in event-driven architecture, multi-cloud delivery (Amazon Web Services, Microsoft Azure, Google Cloud Platform), and AI-augmented engineering, including Retrieval-Augmented Generation (RAG) and agentic systems. Bridges legacy enterprise complexity with modern Generative AI capabilities.

CORE SKILLS

Category	Skills
Leadership and Strategy	Global engineering management (teams of 20), digital transformation, strategic AI advisory, presales and statements of work (SOW), stakeholder management
AI and Augmented Engineering	Agentic architecture, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), LangChain, LangGraph, Amazon Bedrock, Claude Code, Cursor, context engineering
Cloud, Data and Event Streaming	AWS, Azure, GCP, Kubernetes, Terraform, event-driven architecture (Apache Kafka), Databricks, vector databases (Zilliz, Pinecone), PostgreSQL, DynamoDB, Cloud Spanner, Apache Spark
Security and Compliance	OAuth 2.0, SAML, OWASP, PCI DSS, GDPR, HIPAA, ISO/IEC 42001, SPIFFE
Methodologies	DORA metrics, SAgE, Scrum, CI/CD automation, Test-Driven Development (TDD), Domain-Driven Design (DDD), C4 and UML modeling, GitOps
Languages and Frameworks	Java, Python, TypeScript, Kotlin, Scala, Node.js, Spring Boot, Quarkus, React, Angular, .NET, SQL, NoSQL, MongoDB, Redis, Pandas, FastAPI, Next.js, Streamlit
Industry Verticals	Telecommunications, insurance, banking, FinTech, healthcare, IoT, payment processing, supply chain, e-commerce

PROFESSIONAL EXPERIENCE

Principal Consultant, Fractional Architecture and AI Advisory

Independent | Doral, FL | Aug 2025 to Present

- Accelerated minimum viable product (MVP) portal delivery by 75% for a mid-market financial services client by pioneering AI-native development workflows (Claude Code, Cursor, Replit), shortening time-to-market from months to weeks.
- Engineered an agentic EventStorming facilitator in Python and CrewAI that automates domain discovery and synthesizes full Domain-Driven Design (DDD) outputs from targeted sub-domains; open-sourced the reference implementation.
- Developed a voice-agent and intelligent routing MVP for small and mid-sized businesses (SMBs), achieving greater than 95% classification accuracy on incoming service requests and reducing customer churn.
- Conducted AI-readiness assessments for biotech startups, identifying high-value automation vectors, data-readiness gaps, and optimized data engineering pipelines.

Principal Engineer, Associate Director, Digital Engineering and IoT

Cognizant Technology Solutions | Miami, FL | Apr 2021 to Jul 2025

- Scaled global engineering organizations from 1 to 20+ cross-functional engineers and managers across the US, Mexico, and India, delivering multi-million-dollar modernization programs for Fortune 100 enterprises.
- Modernized a Fortune 100 retailer's supply chain by architecting an event-driven visibility platform (Apache Kafka, Apache Camel) supporting 13,000 store locations in near-real-time at more than 2M events per hour.
- Reduced contract information retrieval time by 33% by deploying a production Retrieval-Augmented Generation (RAG) system using Azure OpenAI, LangChain, and the Zilliz vector database, cross-referencing enterprise documents with legacy APIs.
- Boosted system reliability by 35% for a Fortune 500 FinTech by migrating high-volume, on-premises Kafka streaming platforms to AWS cloud-native architectures.
- Architected a high-throughput event migration for a global payments provider, moving core processing to AWS to handle 1.2M hourly transactions.
- Drove delivery velocity as Scrum Master across 34 sprints, maintaining 90% sprint burn-down accuracy and precise Program Increment (PI) planning alignment.

Senior Solutions Architect

Concentrix | Doral, FL | Oct 2020 to Apr 2021

- Designed the architecture runway for a high-scale wearable IoT platform serving 2M+ active customers, ensuring 99.9% availability for critical real-time features.
- Streamlined program prioritization using Weighted Shortest Job First (WSJF) scoring, increasing value-delivery efficiency across 3 consecutive PI planning cycles.

Manager, Technical Architecture and Delivery

Accenture | Doral, FL | Jan 2019 to Jun 2020

- Secured microservices for robotic surgical devices at a major pharmaceutical firm by implementing a Zero-Trust API management and security layer (Apigee, Istio) on Kubernetes.
- Led delivery of a mobile banking app for a Fortune 500 financial institution, integrating legacy mainframes with a modern cloud front-end to scale to 2.4M active users.
- Established a reference architecture for Amazon Connect at a major health insurer, projecting more than \$1.5M in annual operational savings through cloud-native contact center migration.
- Built proof-of-architecture (PoA) demonstrations that secured 2 new Fortune 500 enterprise accounts by validating technical feasibility.

Digital Operations Architect

Millicom | Doral, FL | May 2018 to Nov 2018

- Owned the Digital Services platform for 46M subscribers across 5 countries, managing performance, security, and scalability of an API gateway handling a \$4B per year transaction run rate.
- Enabled rapid digital adoption across Latin America by deploying high-performance APIs via Apigee Edge under enforced service-level agreements (SLAs) and business-critical key performance indicators (KPIs).
- Partnered with InfoSec to implement Secure Software Development Lifecycle (SSDLC) practices, including automated threat modeling and vulnerability testing across customer-facing applications.

Independent Consultant

Self-Employed | Doral, FL | Aug 2016 to Apr 2018

- Provided fractional technical consulting and modernization services for SMBs in Germany and Venezuela.
- Designed and implemented scalable e-commerce infrastructure and automated operational reporting pipelines to revitalize legacy digital products.

Lead Engineer

Spafinder Wellness (startup) | Miami, FL | May 2015 to Jun 2016

- Engineered financial transaction APIs for 25,000 wellness facilities, maintaining 99.9% uptime for core gift-card processing via Java, Spring Boot microservices, and Redis.
- Championed agile best practices and mentored 12+ software engineers across 18 development sprints.

Senior Manager, Production Systems

Verizon | Doral, FL | Sep 2007 to Apr 2015

- Managed a \$9B annual revenue platform serving 25M+ customers, overseeing complex carrier integrations (AT&T, T-Mobile, Sprint) with a 100% success rate on core system releases.
- Cut end-of-month batch fulfillment time by 3x, reducing complex data encryption processing cycles from 3 months to 4 days.
- Optimized Java customer relationship management (CRM) APIs to sustain 35,000 transactions per second (TPS) at peak load while maintaining near-instant data center failover.
- Automated the CI/CD deployment pipeline, reducing production release errors by 50% while doubling deployment frequency.

Earlier Experience

- **Sr. IT Consultant, BTI Services (startup)**, San Juan, PR (Jan 2007 to Oct 2007): Developed and presented an ITIL implementation strategy for a Puerto Rico government agency.
- **Staff Systems Architect, Universal Insurance Group**, San Juan, PR (Sep 2001 to Dec 2006): Delivered the Caribbean's first enterprise-level Service-Oriented Architecture (SOA); supported a 7% loss-ratio reduction via an underwriting business-rules engine, achieved 15% application consolidation, and built the first regional mobile insurance quote engine (BlackBerry, Palm OS).
- **Java Application Architect, Cautus Networks (startup)**, Miami, FL (Sep 2000 to Sep 2001): Application architect and Java subject matter expert for an early Software-as-a-Service (SaaS) ERP solution using Java Swing and J2EE.
- **Senior Consultant, CRM Solutions, Cambridge Technology Partners**, Caracas, Venezuela (May 1999 to Sep 2000): Implemented Siebel CRM and Java middleware at Banco Mercantil for 3M+ clients; increased campaign effectiveness by 65% through data-mining-driven segmentation.
- **Researcher and Professor, Computer Science, Universidad Simon Bolivar**, Caracas, Venezuela (Sep 1996 to May 1999): Lectured and researched algorithms, data structures, compiler theory, and programming language semantics.

EDUCATION

- Master of Science (MSc), Computer Science - Universidad Simon Bolivar
- Bachelor of Science (BSc), Computer Science - Universidad Simon Bolivar

CERTIFICATIONS

- AI Fluency: Framework and Foundations (Anthropic)
- Claude Code (Anthropic)
- Certified Scrum Master (Scrum.org)
- Machine Learning (Stanford / Coursera)
- Developing APIs with Google Cloud Apigee (Specialization)
- Architecting with AWS
- SAFe for Architects 5.0
- Google Cloud Platform Fundamentals: Core Infrastructure
- Principles of Reactive Architecture (IBM)
- IT Project Management (New Horizons)
